# ONYX B Autoclaves

## the proper autoclave for all your needs

### Completely automatic cycles

The range autoclaves Onyx B is born with the aim of rationalizing the work of sterilization operators, therefore the autoclaves are equipped with cycles which have been expressly conceived for improving time management and operator's needs within outpatient clinics.

### Main water system connection

The autoclaves Onyx B are autonomous as equipped with double tank of pure water and exhausted water, they are prepared for the connection to the water supply through osmosis system mod. PURA Plus.

### Big load

Using standard size autoclave about 4 kg instruments can be sterilized, while with Onyx B you can sterilize from 5 kg to 7 kg of instruments. With 1 double load you are saving 50% of your time.

### Full Load System

To avoid manual loads with possibility of water pouring off, Onyx B autoclaves throughout their automatic clean water tank automatic system are using a level sensor control pump with automatic lock.
