

MEGAVAC 2000

Megavac 2000 is semi-wet suction system for 2 dental units.

It supplies powerful vacuum power so it can be used poor conditions with installed long pipe. Also it is specialized in 30~40π sized suction pipes. It doesn't need any water supply so it can save energy and prevent freezing problems in winter. And the noise level is quite low in comparison to other products, approximately 55db.

MEGAVAC 2000 Case

S 101 C

S101 C has also been designed as a single dental unit. So the S101 C is really easy to install in the treatment room. It is compact size but supplies strong vacuum power. The suction motor is installed in the cabinet, so it has a low noise output.
