

360° Rotatable Autoclavable Silver Needle

- Innovative coupling technology prevents leakage and overflow
- 999 pure silver maintain thermoplasticity for smooth flow
- Pre-Bent, extra-long design for convenience and visibility

Electric Motorized GP Flow

- Instant start/stop, retraction prevents leakage
- Smooth, bubble-free extrusion for dense & precise filling

Five Memory Settings (T1-T5)

- Quick access to personalized configurations

Precision Temperature Control

- 3 adjustable filling speeds: low, medium, high
- Temperature range: 100°C - 200°C

LED Display Screen

- Real-Time monitoring of gutta-percha remaining

Instantaneous Heating

- Heating to 180°C takes only 10 seconds

Leakage-Proof Outlet Design

- Innovative extrusion outlet structure effectively prevents leakage and simplifies the cleaning process

Standard Multi-Function Wrench

- Outlet Residue Removal & Inner Tip Cleaning
- Needle Angle Rotation
- Bending adjustments without breakage

Innovative Two Filling Modes for Diverse Clinical Needs

- Standard Filling Mode
- Inject Control Mode with five selectable settings

Standard Insulating Sleeve for Enhanced Safety

Comprehensive Fill Tip Selection
